A Note to the GOS Membership

Steven M. Kane, M.D.

Dear GOS Members,

What kind of newsletter does one write for a year such as this? I could choose some oft quoted utterance from an inspiration character in history. "We have nothing to fear but fear itself... and of course a microparticle that has pretty much changed the way we live and how we practice medicine". Perhaps we could invoke Little Orphan Annie and all join in a rousing rendition of "The Sun'll Come Out Tomorrow....and we'll all watch it through face shields." Ok, how about, "When the going gets tough, the tough put on a mask." I have no idea but what I do know is that I should be writing about the wonderful GOS meeting about to happen in Sea Island and to mention that our speakers this year are from Nascar and the NFL along with a host of informative lectures on a host of relevant topics. Instead, I find myself questioning whether shaking hands, eating in a cozy restaurant, or attending a live conference is in the cards. It's the fall for heavens sake and if I don't find my keister in the stands of a raucous stadium on a beautiful fall day with a hotdog in one hand and my other arm around one of my children or Susan, I'm not sure I am going to make it another year.

But there are some things of which I am sure. First, we are in the greatest profession that anyone could ever have, and we are fortunate to be here. We have all climbed a mountain to be here and the view although sometimes obscured with clouds, is still as good as it gets, and we have much for which to be thankful. As some of you know, I love to read history. Military, political, medical, scientific, and religious history all give me perspective on the world around me and help guide my steps forward. Whenever I wonder what is best path to take, it is assured that someone in history faced the same dilemma and in reading about their choices and outcomes, you gain a wealth of "good advice". Throughout nearly every book I have read in the past 50 years on such things, there is a common theme that I would share with you all. First, there has never been anyone who did not find themselves in a bad way. Second, there are few remedies for a difficult or untimely situation that are more effective than work and service to others. We as orthopedic surgeons and members of the best society of orthopedic surgeons in the country, are uniquely qualified to do just that. The board of directors at GOS have continued to work for our profession

Continued on Page 2

Continued from Page 1

as hard as any year past. We have met with every one of your legislators in the past two months to advocate for improvements in billing, patient access and quality of life for the orthopedic surgeons of Georgia. Your membership and continued support of the society are integral in seeing that those goals are met. Additionally, even with the cancellation of the annual meeting, the board has gone to great lengths to provide our members an online CME meeting that you can still watch from the comfort and safety of your homes at a time that is convenient for you. I encourage you to register and participate in that podcast.

Finally, I encourage every member of GOS, in addition to providing your usual wonderful care to your patients, to find a time or a venue in which to provide service to those who have been hardest hit by this pandemic. Be it through service at your church, synagogue, mosque, civic center, academic institution or

simply through monetary support or assistance to whomever you find in need, speaks volumes as to the character and fortitude of who we are as a group.

Steven M. Kane, M.D.

GOS President (Oct. 2019 – Oct. 2020)

Chairman, Atlanta Medical Center
Orthopedic Residency.

REPORT FROM THE GOS AAOS BOARD OF COUNCILORS

Coronavirus has impacted practically everything we do as orthopaedic surgeons. One of our most important duties is advocacy on behalf of our patients. Every year, the American Academy of Orthopaedic Surgeons has met in Washington, DC for the National Orthopaedic Leadership Conference to advocate for patients and orthopaedic surgeons alike on Capitol Hill – except this year. Meeting in person was simply not possible, but a bold plan was created by our beloved GOS past-president Danny Guy, who just so happens to also be current AAOS 1st vice president. AAOS called for state orthopaedic societies and BOC reps to set up “In-district” virtual meetings with members of Congress and the Senate. GOS rose to the task, coordinated by your BOC reps, Liz Neary, Sarah Moran, and GOS Lobbyist Don Bolia. GOS volunteers spearheaded the meetings – thanks to GOS leads: Drs. Steve Kane, Jeff Smith, Jim Barber, Steve McCollam, Brad Bushnell, Wendell Duncan, Gary Stewart,

Doug Lundy, Lee McCluskey, Danny Guy, Todd Schmidt, Jill Flanagan, Snehal Dalal, and Hal Silcox, along with many other GOS members. We were able to meet with almost every elected official, and we focused attention on four problems for our patients: COVID liability, POH limitations, prior authorization, and CMS reimbursement cuts. Many members of Congress were very receptive to our concerns and pledged support for these important issues.

Advocacy for our patients remains a crucial function of GOS and AAOS. Thank you for your PAC support and your willingness to answer the call when we need your voice!

Respectfully Submitted,

J. Wendell Duncan, MD, FAAOS

Leland McCluskey, MD, FAAOS

Jim Barber, MD, FAAOS

2020 GOS JAMES FUNK, M.D., DISTINGUISHED SERVICE AWARD WINNER

The Georgia Orthopaedic Society James Funk, M.D. Distinguished Service Award is nominated by the membership and is presented to one who has contributed significantly to improving the practice of orthopaedic surgery.

Previous winners are:

Senator Preston Smith (2005)
Dr. Frank Kelly (2006)
Dr. Skoot Dimon (2007)
Dr. George Wright (2008),
Dr. Thomas E. Whitesides (2009)
Senator Greg Goggans (2010)
Dr. Edward Loughlin (2011)
Dr. Robert Wells (2012)

Dr. John C. Garrett (2013)
Dr. James W. Scott (2014).
Congressman Tom Price, M.D. (2015)
Howard A. McMahan, M.D., Major General Ret. USAF (2016)
David F. Apple, Jr., M.D. (2017)
Senator Kay Kirkpatrick, M.D. (2018)
Charles N. Hubbard, M.D. (2019)

F. James Funk Award Winner Stephen M. McCollam, M.D.

The winner of this year's F. James Funk Humanitarian Service Award is Dr. Steve McCollam from Peachtree Orthopedics in Atlanta. Steve is being honored for his career-long devotion to providing healthcare to the underserved population of Haiti. He has been going to Haiti on a regular basis for the past 30 years and has been instrumental in sustaining and improving orthopedic care offered at Hopital Albert Schweitzer (HAS) in Dechappelle, Haiti.

Steve joined Peachtree Orthopaedic Clinic in 1989 and began traveling to Haiti in 1990 with Bob Wells. He has helped bring a new generation of physicians on board to sustain this activity by actively recruiting physicians from Peachtree Orthopaedic Clinic as well as many other groups throughout the state and mentored them in the challenging task of providing medical care in a third world environment. Through his enthusiasm and compassion, he convinced a multitude of orthopedic surgeons to leave their families and practices and go to an often hostile and sometimes dangerous third world nation to take care of problems that they had never seen before with equipment that was sorely lacking. These medical missions have been coupled with efforts in fundraising and equipment procurement here in Atlanta to further support the success of these trips. He arranged for Dr. Kay Wilkins, a renowned pediatric orthopaedic specialist, to visit HAS and teach the Ponsetti method of club foot management that has revolutionized care of this common problem in Dechappelle.

At no time, however, was Dr. McCollam's selfless dedication better witnessed than during the terrible earthquake which struck Haiti on January 12, 2010. Working with Dr. John David

Mullins, a plastic surgeon at Piedmont Hospital who is also an Air Force Reserve Flight Surgeon, Steve secured a private twin engine airplane to fly to Haiti and land at Cap Haitian on the north shore distant from Port-au-Prince. He made multiple phone calls and secured supplies from various orthopedic companies as well as Kennistone Hospital and Piedmont Hospital including \$10,000 cash donation. He rounded up a group of surgeons and nurses from these hospitals on a moment's notice and packed them all into a plane completely surrounded by medical supplies including sorely needed antibiotics and pain medications. HAS is equipped to manage 80 in-patients and the scene which awaited Dr. McCollam's team was something out of *Gone With the Wind* with over 500 injured patients lying on the ground on mats shoulder to shoulder on every square inch of ground around the hospital and in the courtyard. It was an immediate triage scenario and Dr. McCollam was responsible to make care decisions and maximize the benefit they could bring to this devastating situation. Many difficult decisions were required, and he made them utilizing his team to its greatest potential. Steve's leadership was outstanding, and the results realized were only possible due to his and his team's tireless efforts and selflessness in the face of a terrible disaster. Dr. Stephen McCollam stands as a role model for orthopaedic surgeons in Georgia and indeed around the world. His compassion, zeal, devotion and generosity have led to an unimaginable improvement in the lives of so many through his direct work at HAS and his success in relaying his vision to so many other fellow orthopaedic surgeons.

Dr. McCollam is a 1982 graduate of Tulane Medical School and

Continued on Page 4

Continued from Page 3

completed his orthopedic residency at the University of Texas Health Science Center, San Antonio, Texas in 1987 followed by fellowships at St. Vincent's Hand and Microvascular Surgery, Indianapolis, Indiana and an AO international fellowship in Berne, Switzerland. He has been a member of Peachtree Orthopedics since 1988 and has served on the staff of Piedmont Atlanta Hospital since that time. He has served on multiple committees for the AAOS and currently serves as Chairman of the joint BOC/BOS Resolutions Committee. He has been

very active on multiple committees for the American Society for Surgery of the Hand and is a Past President of the Georgia Orthopedic Society, Georgia Society for Surgery of the Hand and Peachtree Orthopedics. He and his wife Kim are newly minted "Empty Nesters" in Atlanta and have 3 lovely daughters, Grace, Clara and Ellie. Despite his busy schedule he still has the energy and courage to don the Speedo and participate in Masters Swimming regularly.

2020 GOS Virtual Annual Meeting Agenda:

TITLE	SPEAKER
STATE, NATIONAL, AND INTERNATIONAL UPDATES	
AAOS 2020 Presidential Update	<i>Joe Bosco, MD</i>
MAG and GOS PAC Update - Advocacy on Orthopedic Issues	<i>Don Bolia/Don Palmisano</i>
Haiti - Orthopedic Care Ten Years After the Earthquake	<i>Steve McCollam, MD</i>
RESIDENT RESEARCH COMPETITION	
1st Place: Capsular Management in Direct Anterior Total Hip Arthroplasty: A Randomized, Single Blind, Controlled Trial	<i>Rahul Goel, MD</i>
2nd Place: Biomechanical Evaluation of Scapholunate Reconstruction Technique	<i>Thomas Neustein, MD</i>
3rd Place: Anterior Revision Total Hip Arthroplasty is Associated with Increased Postoperative Wound Complications Compared to Posterior Revision Surgery	<i>Gregory Kurkis, MD</i>
BASEBALL MEDICINE SYMPOSIUM	
Ulnar Collateral Ligament Reconstruction in Professional Baseball Players	<i>Tim Griffith, MD</i>
Visual Acuity Testing and Its Impact on Baseball Batting Statistics	<i>Steve Kane, MD</i>
Shoulder Pain in Pitchers: What Breaks Down and Why	<i>Xavier Duralde, MD</i>
GUEST SPEAKER TALKS	
GSSH GUEST SPEAKER TALK: William Stewart Halstead: His Genius, Courage, and Impairment	<i>Waldo Floyd, MD</i>
GOS PRESIDENTIAL GUEST SPEAKER TALK Orthopedic Care of Professional Football Athletes	<i>Pat Connor, MD</i>
Racing Safety and Medical Care: What have we learned in since 2001 through Research and Innovation?	<i>William Heisel, PA-C</i>
BUNION SYMPOSIUM	
Minimally Invasive Chevron-Akin procedure for Hallux Valgus	<i>Erroll Bailey, MD</i>
Lapidus Procedure for Bunion Correction	<i>Collier Watson, DO</i>
MTP Fusion and Other Options for Bunion Correction	<i>Lee McCluskey, MD</i>
SPINE SESSIONS	
Basics of Sagittal Spinal Alignment and Reconstruction	<i>Doug Kasow, DO</i>
The Effect of Intra-Operative Methadone on Post-Operative Pain Control for Posterior Spinal Fusion for Adolescent Idiopathic Scoliosis	<i>Joshua Murphy, MD</i>

THE GEORGIA ORTHOPAEDIC SOCIETY WOULD LIKE TO THANK THE FOLLOWING COMPANIES FOR THEIR SUPPORT OF THE 2020 VIRTUAL ANNUAL MEETING

TIER I EXHIBITORS

DePuy Synthes

Darin O'Tuel
dotuel@its.jnj.com
508-880-8100

DePuy Synthes, part of the Johnson & Johnson Medical Devices Companies, provides one of the most comprehensive orthopaedics portfolios in the world. DePuy Synthes solutions, in specialties including joint reconstruction, trauma, craniomaxillofacial, spinal surgery and sports medicine, are designed to advance patient care while delivering clinical and economic value to health care systems worldwide. As we celebrate 125 years of innovation, our commitment is to keep people moving.

Smith & Nephew

Bob McGlamery or Karla Hines
Bob.McGlamery@smith-nephew.com
Karla.Hines@smith-nephew.com

Manufacturer/Distributor of Medical Devices/Implants & Instruments (Reconstructive, Trauma, Sports Medicine)

United Orthopedics

Karen Carter
kcarter@unitedorthollc.com
770-541-0100

United Orthopedics, Veritas Surgical Solutions and Team 1 are the Arthrex Distributor's for the state of Georgia. As independent regional distributors authorized to sell Arthrex products we work with surgeons and healthcare professionals to help treat their patients better. Arthrex is a world-class leader in the orthopedic industry.

TIER II EXHIBITORS

Acumed

Greg Broms
gregbroms@comcast.net

Distributor of orthopedic devices

Biocomposites

americas@biocomposites.com

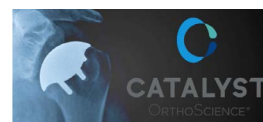

At Biocomposites, we are distinct in that our team of specialists is singularly focused on the development of innovative calcium compounds for surgical use. Our innovative products are at the forefront of calcium technology and range from bone grafts to matrices that can be used in the presence of infection. We are proud to be driving improved outcomes across a wide range of clinical applications, in musculoskeletal infection, trauma, spine and sports injuries, for surgeons and patients alike.

Catalyst OrthoScience

Bob Jacobs
239-325-9976

The Catalyst CSR Shoulder System is a canal-sparing, bone-preserving total shoulder replacement designed to allow surgeons to accurately restore normal shoulder anatomy to a new level of consistency and precision. This is done primarily in two ways: 1) designing a novel implant that replicates the non-spherical shape of the humerus and 2) utilizing patented new instruments designed to position the implant to replicate the native joint line. In addition, the instruments simplify the most difficult steps of the operation and streamline the surgical procedure.

CBIZ

Nelson Guzman, CIC, CRM
nguzman@cbiz.com
 404-791-8822

CBIZ offers a GOS Malpractice Discount of up to 25% for qualified members willing to complete risk management. Claim Free GOS members may also be eligible for an additional 25% discount in claim free credit. CBIZ Insurance Services has over 30 years of experience helping physician practices find the best Medical Malpractice Insurance coverage at the lowest premium possible. We represent multiple insurance carriers, allowing us the flexibility to provide the best value. Please click on our logo for your GOS discounted quote.

**EMG Solutions**

Quinn Millington
quinn@emgsolutions.com
 334-224-1239

EMG Solutions partners with hospitals and clinics to provide high quality electrodiagnostic studies in-house. Scheduling is hassle-free and reports are read and returned within 24 hours. EMG Solutions currently works with many large, medium and small orthopaedic and specialty practices in Georgia, Alabama, Tennessee and Kentucky. This solution allows physician practices and hospitals to control patient flow and generate additional in-house revenue.

**MAG Mutual**

For nearly four decades, MagMutual has been a leading provider of medical professional liability insurance. Today, we deliver comprehensive coverage for the practice, business and regulation of medicine to more than 30,000 physicians and healthcare organizations nationwide. Our focus on innovation enables us to provide exceptional service, extensive support and financial benefits that result in improved outcomes and stronger PolicyOwners™.

**NuVasive**

Jeff Blumenthal
jblumenthal@nuvasive.com

NuVasive is the leader in spine technology innovation, focused on transforming spine surgery and beyond with minimally disruptive, procedurally integrated solutions designed to deliver reproducible and clinically-proven surgical outcomes. The Company's portfolio includes access instruments, implantable hardware, biologics, software systems for surgical planning, navigation and imaging solutions, magnetically adjustable implant systems for spine and orthopedics, and intraoperative monitoring service offerings. For more information, please visit www.nuvasive.com

**Wright Medical**

Donnie Durham
donnie.durham@wright.com

Wright Medical Group N.V. is a global medical device company focused on extremities and biologics products. The company is committed to delivering innovative, value-added solutions improving the quality of life for patients worldwide. Wright is a recognized leader of surgical solutions for the upper extremities (shoulder, elbow, wrist and hand), lower extremities (foot and ankle) and biologics markets, three of the fastest growing segments in orthopaedics.

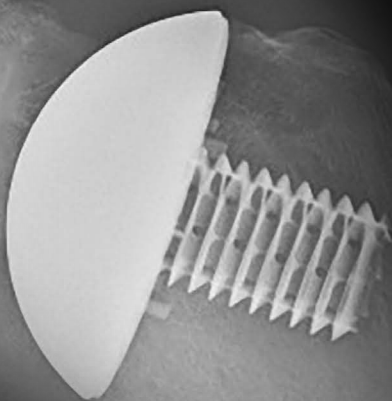

**Zimmer Biomet**

Founded in 1927 and headquartered in Warsaw, Indiana, Zimmer Biomet is a global leader in musculoskeletal healthcare. We design, manufacture and market orthopaedic reconstructive products; sports medicine, biologics, extremities and trauma products.

ECLIPSE™

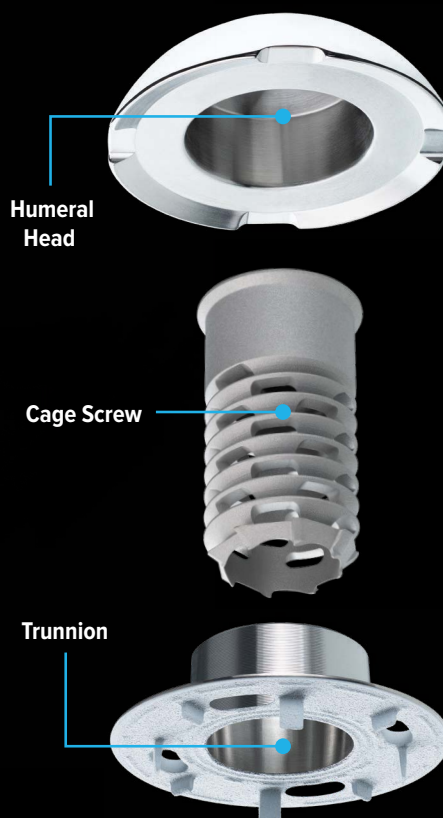

A Decade of Evidence-Based Outcomes

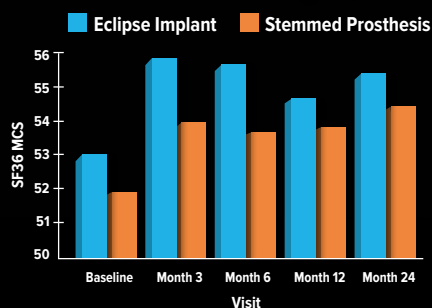

- Only canal-sparing anatomic humeral implant with peer-reviewed, long-term follow-up
- No humeral loosening observed at mean follow-up of 11 years (105-157 months)¹
- Proprietary screw fixation shows reduced medial calcar osteolysis when compared to impaction-type designs²
- Implant design compatible with robust double-row subscapularis repair

Compared Data Between Cohorts A and B²

	Cohort A Eclipse™ Implant Featuring Unique Cage-Screw Fixation	Cohort B Stemless Implant With Conventional Impaction Fixation
N	18	21
Mean age (years)	66.7	67.4
Mean follow-up (months)	42.2 months (range 24-72)	36.3 months (range 24-48)
Medial calcar osteolysis	0/18	7/21

Patient Evaluation for Overall Quality of Life and Function²
